Shelterguard™ for shrubs

Product Information Sheet

Issue: 01 Date: 05.04.13

DESCRIPTION Extruded and welded recycled HDPE mesh guard which protects and helps establish trees

APPLICATION For the protection of trees against animal browsing, herbicide spray and for the improvement of growth through a microclimate

SECTORS Forestry and Horticulture

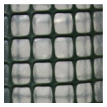
Clear polythene film degrades after 3 years, allowing acclimitisation of the tree to the outside environment

Weld line: shelter splits avoiding strangulation as plant grows

UV stabilised: provides minimum 5 year protection

Top lip; minimises stem abrasion

Pre-fitted releasable ties; quick, easy installation and maintenance



Translucent green; maximises light transmission for photosynthesis
