

Vinewrap

Our unique wrap for viticulture, the TUBEX Vinewrap allows access to the vine for maintenance as well as providing plant protection.

The TUBEX Vinewrap is a twin-walled tube that has been split vertically, enabling it to wrap around a vine and expand as the plant grows. It can also be installed and removed easily allowing for bud rubbing and inspection. The TUBEX Vinewrap also provides protection against animal browsing, herbicide sprays and accidental damage during mechanical weeding.

*Vineshelter longevity is dependent on site and weather conditions but is typically a minimum 2 years

PRODUCTS	VINEWRAP
Heights (m)	0.6
Diameter (mm)	75 expanding to 95
Nest	2
Bundles	100
Colour	Green
Ties	N/A
Support	Push into ground - cane

- Shelter longevity is dependent on site and weather conditions and can vary considerably.

TUBEX Data sheets, Installation & Case studies can be downloaded freely from www.tubex.com

Overview of Vineshelters

TUBEX vineshelters have been specially designed to provide the right solution for your planting needs. Over the years we have developed unique features that all contribute to the effective establishment of vines and fruit trees.

Features of vineshelters:

 <p>Laserline, designed to split avoiding strangulation as plant grows</p>	 <p>Nested for ease of transport and storage, whilst maintaining original shape</p>	 <p>Flared rim to minimise stem abrasion</p>
 <p>Pre fitted thumb releasable ties for quick, easy installation and maintenance</p>	 <p>Twin wall construction for rigidity and best strength to weight ratio</p>	 <p>UV stabilised polypropylene to provide minimum 2 year protection</p>
 <p>Top holes, allows attachment to trellis wire</p>	 <p>Wrap splits vertically, expanding as tree grows</p>	 <p>Strengthening rods at stake area to prevent tearing of the vineshelter</p>

Features of mesh range:

 <p>Pre fitted thumb releasable ties for quick, easy installation and maintenance</p>	 <p>UV stabilised and made from recycled plastic to provide minimum 7 year protection</p>	 <p>Flared rim to minimise stem abrasion</p>
 <p>Nested for ease of transport and storage, whilst maintaining original shape</p>	 <p>Weld line and flared rim splits avoiding strangulation as plant grows</p>	

- Shelter longevity is dependent on site and weather conditions and can vary considerably.
