

Plantation

The vineshelter designed for larger planting jobs, TUBEX Plantation is provided flat-packed for ease of transportation and storage.

TUBEX Plantation is a flat-packed vineshelter made from the same inert polypropylene as our other TUBEX products. Flat-packed means that the product can be stored and transported economically because it takes up less space, so more can be carried by hand or vehicle at any time. A little more time is required to open and install the vineshelter correctly, but if done with care TUBEX Plantation offers the same protection against herbicide, mechanical weeding processes and animal browsing.

*Vineshelter longevity is dependent on site and weather conditions but is typically a minimum 2 years

PRODUCTS	PLANTATION
Heights (m)	0.4, 0.5, 0.6
Diameter (mm)	90
Nest	5
Bundles	100
Colour	White / (0.6 Green only)
Ties	N/A
Support	Cane or metal rod

- Shelter longevity is dependent on site and weather conditions and can vary considerably.

Overview of Vineshelters

TUBEX vineshelters have been specially designed to provide the right solution for your planting needs. Over the years we have developed unique features that all contribute to the effective establishment of vines and fruit trees.

Features of vineshelters:

 <p>Laserline, designed to split avoiding strangulation as plant grows</p>	 <p>Nested for ease of transport and storage, whilst maintaining original shape</p>	 <p>Flared rim to minimise stem abrasion</p>
 <p>Pre fitted thumb releasable ties for quick, easy installation and maintenance</p>	 <p>Twin wall construction for rigidity and best strength to weight ratio</p>	 <p>UV stabilised polypropylene to provide minimum 2 year protection</p>
 <p>Top holes, allows attachment to trellis wire</p>	 <p>Wrap splits vertically, expanding as tree grows</p>	 <p>Strengthening rods at stake area to prevent tearing of the vineshelter</p>

Features of mesh range:

 <p>Pre fitted thumb releasable ties for quick, easy installation and maintenance</p>	 <p>UV stabilised and made from recycled plastic to provide minimum 7 year protection</p>	 <p>Flared rim to minimise stem abrasion</p>
 <p>Nested for ease of transport and storage, whilst maintaining original shape</p>	 <p>Weld line and flared rim splits avoiding strangulation as plant grows</p>	

- Shelter longevity is dependent on site and weather conditions and can vary considerably.
