

Ventex

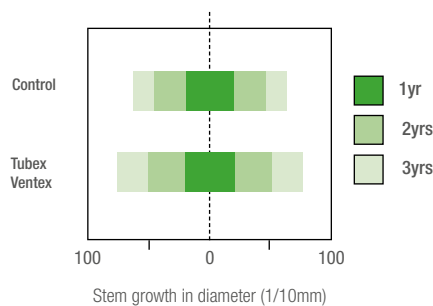

With a patented design, the TUBEX Ventex is the most popular shelter in Europe balancing the benefits of enhanced growth, reliable plant protection and sturdy stems.

TUBEX Ventex is designed to last a minimum of 5 years*, boosting the chances of survival and healthy growth through the early stages of the tree's life. TUBEX Ventex improves growing conditions for trees by modifying the traditional treeshelter balance of CO₂, air humidity and light resulting in the perfect 'equilibrium'. These modified conditions are produced through specifically sized and positioned ventilation holes as well as a green colour to enhance light transmission. This shelter provides plant protection, however is better suited to an environment where contact herbicide spraying is not used.

*shelter longevity is dependent on site and weather conditions but is typically 7 years plus.

PRODUCT	VENTEX
Heights (m)	0.9, 1.2, 1.5, 1.8
Diameter (mm)	80 - 120
Nest	5
Bundles	60
Colour	Green
Ties	2 x 10"
Support	Stake

Studies done in the early 90's showed how ventilation in the shelter increases the stem diameter.

- Shelter longevity is dependent on site and weather conditions and can vary considerably.

Overview of our product range

TUBEX shelters have been specially designed to provide the right solution for your planting needs. Over the years we have developed unique features that all contribute to the effective establishment of trees.

Features of shelters:

 <p>Laserline, designed to split avoiding strangulation as plant grows</p>	 <p>Nested for ease of transport and storage, whilst maintaining original shape</p>	 <p>Flared rim to minimise stem abrasion</p>
 <p>Pre fitted thumb releasable ties for quick, easy installation and maintenance</p>	 <p>Twin wall construction for rigidity and best strength to weight ratio</p>	 <p>UV stabilised polypropylene to provide minimum 5 year protection</p>
 <p>Laserline, designed to split avoiding strangulation as plant grows</p>	 <p>Optional extras include punched holes for ventilation</p>	 <p>Renewable material source and greater flexibility over degradation</p>

Features of mesh range:

 <p>Pre fitted thumb releasable ties for quick, easy installation and maintenance</p>	 <p>UV stabilised and made from recycled plastic to provide minimum 7 year protection</p>	 <p>Flared rim to minimise stem abrasion</p>
 <p>Nested for ease of transport and storage, whilst maintaining original shape</p>	 <p>Weld line and flared rim splits avoiding strangulation as plant grows</p>	

- Shelter longevity is dependent on site and weather conditions and can vary considerably.
