

# Tubex Nature Easysleeve

BIODEGRADABLE  
TREE PROTECTION

## OUR ECONOMIC 100% BIODEGRADABLE GROWTH AND PROTECTION SOLUTION FOR THE INITIAL ESTABLISHMENT PERIOD

Nature Easysleeves are fully biodegradable making them ideal for hedgeplanting where removal at end of life may be difficult or collection isn't possible.

Our biodegradable shelters are expected to last for 3 years with the classic Tubex twin wall shelter design, boosting the chances of survival and healthy growth through the first initial stages of the tree's life. Nature Easysleeves' smaller diameters make them suitable for small slender plants used in hedging and small scale landscaping.

### BENEFITS

- **Biodegradable in situ** - Made from bio-based materials derived from starch, plant and vegetable sources. Externally tested against ISO 17556 to show soil biodegradability, and independently tested to show biodegradation both on soil and in soil at ambient temperatures. Over time, they will breakdown into water and CO2 through a microbiological process.
- **Non-toxic** - Externally tested against OECD 207 & 208.
- **Proven performance** - Robust twin-walled construction to provide enhanced growth through a microclimate. Expected to perform for 3 years whilst offering protection against browsing animals.
- **Rapid & easy installation\*** - Simply placed over the plant and a supporting bamboo cane.

\*Tubex Nature Easysleeves are not suitable for large exposed sites where a Tubex Nature Standard shelter fixed to a wooden stake with a released zip tie is recommended.

### PRODUCT SPECIFICATIONS

Dimensions	Easysleeve 0.6	Easysleeve 0.75
Height (m)	0.6	0.75
Diameter (mm)	57 - 73	57 - 73
Av. Weight per Tube (g)	45	55
Material		
Tube	Bio-based Blend	
Colour	Light Brown	
Expected service Life*	3 years	
Manufacturing Tolerance	-2.5 cm	
Recommended Support	Bamboo Cane	
Packaging		
Tubes per Nest	3	
Tubes per Bundle	150	
Bag, Box or Strap Banded	Bag - Strap Banded	

\*Product longevity is dependent on site and weather conditions and cannot be guaranteed.

TUBEX NATURE™ products are designed to naturally biodegrade over time. Due to this property, Tubex advise Nature products are not used near roads, pathways or locations where disintegration fragments could pose safety risks. For such applications, we recommend our [Recyclable Range](#). TUBEX® accepts no liability for use or installation of the products in unsuitable environments.

#### Twin wall

Minimises weight while maximising strength

#### Nested

For efficient transportation

#### No fixing ties

For fast installation and maintenance

#### Flared Top

Minimises stem abrasion

#### Excellent light transmission

Accelerates growth by creating a microclimate
